The Cessna 150 is a two-seat tricycle gear general aviation airplane that was designed for flight training, touring and personal use.. The Cessna 150 is the fifth most produced civilian plane ever, with 23,839 aircraft produced. The Cessna 150 was offered for sale in the 150 basic model, Commuter, Commuter II, Patroller and the aerobatic Aerobat models. The early Cessna 210 (210 and 210A) had four seats with a Continental IO-470 engine of 260 hp (190 kW). It was essentially a Cessna 182B to which was added a retractable landing gear, swept tail, and a new wing. In 1961 the fuselage and wing were completely redesigned – the fuselage was made wider and deeper, and a third side window was added.
