Private security in the United States began in 1857, when the Pinkerton Detective Agency was formed. Definitions that pertain to the various aspects of security are reviewed. Lastly, it is emphasized that security should be considered as more service oriented rather than approaching it from a “tough-guy” perspective. Example: A private security agent observes a person in the act of stealing property, and confronts the person directly. The agent may retake the property by force if necessary. Example: A private security agent learns that a person possesses property stolen a week ago. The Effective Security Officer's Training Manual, Third Edition teaches today's security officers the most important aspects of performing the job of a security officer professionally and effectively. Training is the most important element in becoming a professional security officer, but it is also often overlooked or underutilized. The right to security is fundamental to any state. The GOSL security forces (i.e. RSLAF/SLP) are wholly concerned with the security of the state and its territorial integrity. Private Security Companies (PSCs) provide safety and security to the people and the property they safeguard.
