When TaylorMade launched the new SLDR S driver, golf fans everywhere began asking what's new? With a new look, the SLDR S promised "distance for all", but how exactly does it differ from the successful and much talked-about TaylorMade SLDR driver.. I got my hands on a 10-degree SLDR S and put it up against a 10-degree SLDR to find out if there really is a difference between the two. As we approach the end of 2013, you may be asking what is new with the 4th driver TaylorMade have announced this year following the TaylorMade Black R1 Driver, the TaylorMade RBZ Stage 2 Driver and the TaylorMade SLDR Driver. A fair question and one for which TaylorMade has the answer in its pocket. #1: TaylorMade Men's M1 460cc Driver It is one of the best golf drivers with customization options that allow golf players to set up everything according to their style. It has various vital components such as M1aTMs lightweight crown that would enable the player to achieve the maximum trajectory for an excellent ball flight. Description The TaylorMade M2 2017 driver was created with a multi-material design of titanium and carbon composite to allow for maximum distance and forgiveness.
